EDUCATION

Dickinson College Carlisle, PA
B.S. Data Analytics, Finance & Quantitative Economics (Triple Major) | Dean's List *Expected May 2028*

- **Relevant Coursework:** Data Systems, Data Visualization, Statistical & Machine Learning, Probability & Statistics, Econometrics, Finance
- **Certifications:** Goldman Sachs Data Analyst Job Simulation (Forage); DataCamp – Intermediate SQL, Power BI & DAX, Web Scraping

EXPERIENCE

Transfer Pricing Intern May 2026 – Aug 2026
BDO Vietnam *Hanoi, Vietnam*

- Supported a senior consultant on 3 client engagements (logistics, steel manufacturing, electrical equipment), running BvD Orbis comparable searches with 9 screening criteria to narrow a 10M+ company universe to sets of ~10 comparables.
- Built exclusion matrices and interquartile ranges of operating margin and net cost plus to test arm's-length results.
- Automated translation of 2,000+ company business descriptions with Python (openpyxl, deep-translator), adding caching and checkpoint saves to replace hours of manual work.
- Converted financials from VND to USD, compiled intercompany-loan interest benchmarks, and prepared bilingual appendices.

Data Analytics Intern May 2025 – Aug 2025
VNPay – Vietnam Payment Solution JSC *Hanoi, Vietnam*

- Analyzed 25.2M+ transactions from 1M+ customers in Python and SQL, finding demand peaks on holidays and after work.
- Built an RFM model classifying customers into 5 value tiers, finding 41% were loyal or high-value and 38% had lapsed, including 16% lost high-value customers.
- Applied K-means clustering to form 4 behavioral segments by genre and purchase timing; presented 3 campaign proposals to team leads and cross-functional stakeholders.

DATA ANALYTICS PROJECTS

Maritime Trade Risk Dashboard | Python (UN Comtrade API), SQL Server, Power BI, DAX

- Pulled UN Comtrade trade flows through the API and modeled them in a SQL Server star schema, cleaning product, country, and transport-mode data for analysis.
- Designed sea-dependency, air-feasibility, and combined risk scores, and built a 7-page Power BI dashboard that lets a supply-chain risk team drill down from category to product.
- Found that bulk commodities such as fuels, food, and steel carry the most risk, and caught a mislabeled data column that had reversed the original report's conclusion.

The Gender Wage Gap, 2012–2025 | Python (pandas, statsmodels, pyfixest), Stata

- Analyzed 14 years of U.S. Census survey data (IPUMS CPS), comparing raw, controlled, and within-occupation gaps with survey-weighted regressions and fixed effects.
- Used quantile regression and an Oaxaca-Blinder decomposition to show the controlled gap has held near 21% since 2012 and is widest at the top of the pay scale; replicated results in Stata.

IMDb Actor & Actress Career Analysis | SQL (SQLite), SQLAlchemy, pandas, seaborn

- Wrote reusable, parameterized SQL functions joining 4 tables (titles, crew, people, ratings) to rank performers by filters.
- Showed how a single vote-count threshold reshapes the rankings, and that making more films does not raise ratings in mainstream genres.

LEADERSHIP & CAMPUS INVOLVEMENT

Lead Community Service Aide, Dickinson College Department of Public Safety Aug 2026 – Present

- Recruit, select, and train student CSAs (Community Service Aides); run building security and campus safety lighting checks and emergency phones.

Vice President, Vietnamese Student Association, Dickinson College Sep 2025 – Sep 2026

- Led cultural festivals and community events for 200+ students and partnered with college departments on cross-cultural sustainability projects.

SKILLS

Programming & Data: Python (pandas, matplotlib, seaborn, statsmodels), SQL (SQL Server, SQLite), R, Stata, Jupyter
BI & Visualization: Power BI (DAX, Power Query), Tableau, Qlik Cloud, Apache Superset, Excel
Analytics: ETL, star-schema modeling, regression (OLS, logistic, quantile), K-means, RFM, Random Forest, XGBoost
Finance & Languages: Financial statement analysis, transfer pricing (BvD Orbis) | Vietnamese (native), English (fluent)
